# Avery Example

Fictional profile • example@example.com • Portfolio

## Profile

Software engineer interested in accessible tools and reliable data workflows. All employers, projects, dates, and results below are fictional template content.

## Experience

### Cedar Studio (fictional)

Software Engineer

2024–2026

- Built document search workflows with source citations, permission checks, and clear recovery messages.
- Added **80 regression scenarios** covering empty results, timeouts, and changes to document access.

## Projects

### Lantern Notes (fictional)

Independent Developer

2025

- Created a local reading notebook using Python, TypeScript, and SQLite with search and Markdown export.

## Education

### Example Institute (fictional)

BSc Computer Science

2020–2024

Coursework: databases, algorithms, software engineering, and human computer interaction.

## Skills

Python, TypeScript, SQL, Git, test design, and technical documentation.
